Demand Trends & Growth Analysis

Year: All

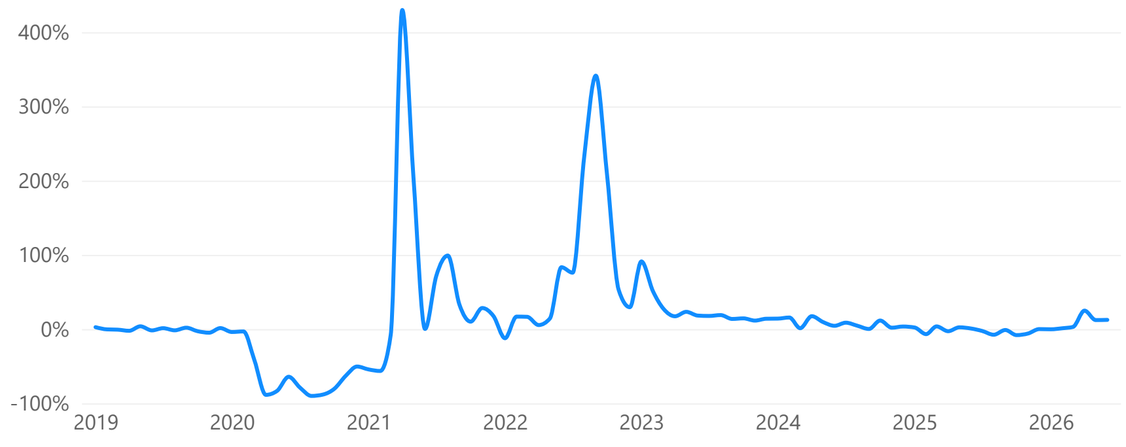

Transport mode: All

Monthly Patronage Growth (MoM %)

Year-on-Year Patronage Growth (YoY %)

Note: Large percentage movements during 2020–2022 should be interpreted in the context of unusually low comparison-period patronage.

Largest Absolute Monthly Movements

Month Start	Total Patronage	MoM Change	MoM Growth (%)	Absolute MoM Growth (%)
November 2021	23500190	11898891	102.57%	102.57%
April 2020	5539890	-27686003	-83.33%	83.33%
October 2020	10539987	4662784	79.34%	79.34%
June 2020	16662141	7093101	74.13%	74.13%
November 2020	18301612	7761625	73.64%	73.64%

** The dataset contains aggregated monthly patronage, rather than individual passenger journeys or direct measurements of overcrowding and delays.*

Key Business Insights

1. Metropolitan train services contribute the largest share of total recorded patronage, followed by metropolitan tram services.
2. Total patronage in June 2026 increased by approximately 12.45% compared with June 2025.
3. Total patronage during January–June 2026 was approximately 8.98% higher than the corresponding period in 2025.

Management Considerations

1. Monitor patronage trends across metropolitan transport modes.
2. Review periods with significant month-on-month changes to identify whether they reflect demand changes or data methodology changes.
3. Use comparable periods when evaluating annual performance.
